

AI cannot connect to the server

Overview

This issue usually happens due to temporary server problems, not your system. The good news is that most of these errors are short-term and easy to fix. To set your self to the AI Seat you require an active AI Subscription (or trial) to the Unity AI. Once you have got one of these subscriptions, head to your unity dashboard → Administration → Subscriptions and then press on “Manage Seats” (you may need to first press Manage Subscription) and then. To use Burp AI, your network must allow outbound HTTPS traffic to ai. If you can't see your AI credits or. When I try to setup the connection in the playground it seems to take a long time to connect to the MCP server (if it really is, not sure) and then goes to the page to list the tools and errors out with “Unable to load tools”. I have switched the MCP server transport type from sse to streamable. If you have any trouble with the software please make sure that the built-in firewall has default security settings that may not prevent ALPHA AI from connecting to the Ackuretta server. I have two agents deployed in Azure AI Foundry (Switzerland North), both using a shared GPT-4. 1 model deployment: Agent 1: apples-agent Has an MCP server configured The MCP server exposes one tool: returns the number of apples in my basket Works correctly when invoked directly - returns expected.
