

## Bulgaria s Energy Internet

### Overview

The cost of utilities and internet in Bulgaria can range from \$100 to \$250 per month for a medium-sized apartment, depending on usage and provider. Bulgaria's utility infrastructure is relatively well-developed, with most apartments and houses having access to electricity, water, gas. Baseload power plants (coal, nuclear) generated a total of 28,46TWh of electricity in 2024, which is 10. Renewable electricity capacity (mostly solar PV). In the energy domain, there are many different units thrown around — joules, exajoules, million tonnes of oil equivalents, barrel equivalents, British thermal units, terawatt-hours, to name a few. This can be confusing, and make comparisons difficult. Kozloduy Nuclear Power Plant is the largest power plant of Bulgaria. Energy in Bulgaria is among the most important sectors of the national economy and encompasses energy and electricity production, consumption and transportation in Bulgaria. The national energy policy is guided by the. Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored.
