

# Can mobile fiber optic routers limit speed

## Overview

In summary, a router doesn't affect your internet speed, but it sure can make the internet feel slower than molasses running uphill. Upgrading to a plan with a higher bandwidth doesn't help if your router can't handle your current network load or faster internet speeds. Does the T-Mobile Home Internet router cap speeds at a certain point regardless of faster speeds in the area?

(REPOSTED FROM R/TMOBILE) : r/tmobileisp This is the unofficial subreddit for T-Mobile ISP/Home Internet service. Known for breaking major streaming stories, he's covered everything from Netflix policy shifts to Peacock's ad-tier changes. A sci-fi fan and Toshiba. SLT-MOBITEL Fibre connections are optimized to deliver superior speeds, up to 1 Gbps and 300 Mbps respectively at highest quality of service. I worked with the Cybernews. The TP-Link Speed Limit (Bandwidth Control) feature lets you throttle internet speed on a per-device basis — useful for preventing one device from hogging bandwidth or keeping connections fair for everyone in the household. When it comes to internet, “fast” is a relative term. For years the Federal Communications Commission's broadband speed standard was 25 Mbps download and 3 Mbps upload. You'd have trouble watching.
