

Can the Xiaomi Router 4C be used with fiber optic internet

Overview

The Xiaomi Mi router 4C is equipped with an Ethernet WAN connection, making it suitable for wired internet setups. It does not support DSL WAN or have a SIM card slot for mobile broadband connectivity. Additionally, it is not compatible with 3G/4G USB modems. Large 64MB memory for quick processing and stable operation. With up to 64MB of memory, data transmission is more stable, ensuring the smooth operation of a larger number of functions and the stable connectivity of more smart devices. With a maximum WLAN data transfer rate of 300 Mbit/s, this. User Manual of Mi Router 4C. All images are for illustration purposes only and may differ from the actual product by model and region. Four External Antennas - Includes four high-performance external antennas that improve signal coverage and. Fiber internet transmits data using light signals through fiber-optic cables, which differs from traditional DSL or cable internet. Instead of a modem, fiber connections require an Optical Network Terminal (ONT), a device that converts fiber signals into an Ethernet connection.
