

# Charging of the integrated optical power meter

## Overview

The CPIM1000 Integrated Meter is built into CP6000 charging stations. The meter connects to the power plate with plug-in connectors. Thorlabs This part of the instruction manual contains every specific information on how to handle and use the PMxxx Optical Power Meter system. It is assumed that the user has basic computer experience and skills, and is familiar with telecommunication and other concepts. Thorlabs' expanding line of optical power and energy meters includes a large selection of sensor heads, single- and dual-channel power and energy meter consoles, power and energy meter interfaces, a wireless power meter with a built-in photodiode sensor, and a fiber optic power meter designed for. ments to the instrument's performance and functionality. However, should you have any questions or fi gistered users with a variety of information and services. If you are looking for a low cost device capable of saving and reporting take a look at the RP460 or.
