

# Connect two switches to the optical module

## Overview

Can two switches with fiber ports be directly connected through fiber ports?

The answer is yes. The connection between two or more Ethernet switches in a certain way (Uplink port, etc. Moreover, when it comes to bandwidth, no currently available technology is better than single-mode fiber. It can provide significantly higher bandwidth and carry more data. Will the modules be compatible and operate flawlessly on my switches?

This article will lead you to figure out the interoperability and compatibility nature of the optical transceivers. What Is a 10Gb SFP Module?

A 10Gb SFP (Small Form-factor Pluggable) module is a compact, hot-swappable transceiver used to establish high-speed fiber. How to use SFP optical module and switch together Different types of optical modules are connected to switches and can be applied to different networking solutions. As one of optical module manufacturers, we will introduce several practical application solutions for SFP optical modules and. In high-speed data networks, the seamless integration of fiber optic cables with SFP (Small Form-Factor Pluggable) modules is critical for reliable signal transmission.
