

Current Status of IDC Data Center Construction in the Netherlands

Overview

The Dutch economy risks losing billions of euros as data center expansion comes to a halt, De Telegraaf reported, citing a new ING analysis. Amsterdam's power grid is full, preventing new data centers from being built until 2035, even though the city is the country's. The Dutch Datacentra Association (DDA) has confirmed that four of these facilities will be located in Haarlemmermeer, near Schiphol Airport. "There is still a. With pride, we present the anniversary edition of our annual State of the Dutch Data Centers report, this year themed: "From Boom to Bottlenecks. The report described data centers as "incredibly important" to the Netherlands' economy, but posited that the sector's. As of 2025, the Netherlands boasts over 125 operational data centers, with 11 new facilities under development across 46 locations. The Netherlands Data Center Market was valued at USD 1.
