

Czech Republic sells laser diodes origin of production

Overview

is a semiconductor laser production facility. The company initiated a setup of an epitaxial growth facility near Prague, Czech Republic to commercially produce EELs, VCSELs as complete devices. (Kralupy nad Vltavou, Czechia) is an international supplier of high power laser systems and components for industrial and scientific applications. Astrum LT is the place to go for all well-known laser types - Nd:Yag, diode, KTP, Erbium, Holmium, Thulium, Q-switched and picosecond. Astrum LT s. o specializes in the production of laser diodes for medical, industrial. 2022 - The company constructed a built-in structure for manufacture in the production and storage facility, commissioned robotic workplaces for welding and bending, and equipped the quality control department with a 3D measuring arm. 2019 - After the purchase, LASER-TECH carried out a demanding. Our goal is to reach scientific excellence that enables innovative solutions. Our biggest advantage is the knowledge of technology given by more than 25 years of own development and innovations.
