

Do I need a dedicated fiber optic router

Overview

The good news: Fiber-optic internet does not require a special router in most cases. However, having a router that is optimized for. Fiber optic internet demands specific hardware, but do you truly need a special router?

This guide clarifies the requirements for optimal performance, explaining what your existing router can handle and when an upgrade is essential for unlocking the full potential of your blazing-fast fiber. Most fiber ISPs, including Mercury, provide an ONT that connects directly to your router via an Ethernet cable. While many users ask if fiber internet needs a modem, it actually. To enjoy lightning-fast downloads and stable connections with fiber internet, you need a few pieces of specialized equipment and a dedicated setup. Luckily, you don't need to worry about a thing – your fiber provider will handle it all for you. Your new fiber ISP will have new fiber-ready routers available if needed and help you set it up and connect all your devices.
