

Fiber optic cable fault in Albania and Ivory Coast

Overview

Earlier this month, three undersea fiber cables in the Red Sea were cut, disrupting an estimated 25 percent of Internet traffic in the Middle East, Asia, and Europe and forcing plans to reroute traffic. The cause of these damaged cables hasn't been confirmed. The Internet Outages Map is an at-a-glance visualization of global Internet health over the last 24 hours, tracking Internet outages across ISPs, top application providers, public clouds, and edge service networks. Which cables are damaged?

According to reports from. The Submarine Cable Map is a free and regularly updated resource from TeleGeography. TeleGeography's comprehensive and regularly updated interactive map of the world's major submarine cable systems and landing stations. Some countries, including Ghana and Nigeria, are still suffering from nationwide outages. "The incident affects networks supplying.
