

Fiber optic cable protection pipe on pole tower

Overview

Riser Tubing is a non-metallic, UV-stabilized PVC pipe used to protect vertical sections of fiber optic and copper drop cables where they exit underground conduit and transition into buildings or network terminals. Many service calls resulting from accidental cable damage can be prevented by the use of riser pipes and wire guards. Proper wire management of both aerial and buried wire drops and ground wires not only increases safety, but also is aesthetically pleasing at the customer premises. In addition, our Guy Markers are used on towers that utilize guy wires, such as, cell phone. Whether for underground or overground installations, you have a wide choice of cable protection solutions to ensure your power and cable lines are fully protected during repair, retrofitting or construction work. At our facility, we manufacture high-quality Plastic Splitting Riser Tubing engineered to deliver. All Safety Climb Systems include Upper Cable Support Bracket, Plastic Cap, Cable Cushion, Cable Strand Vise, Cable Stand-offs, Lower Cable Support Bracket, Tension Rod, and 3/8" Extra High Strength. Yet, outdoors, they face temperature swings, moisture, UV exposure, rodents, and human interference. Protecting them is essential for long-term reliability. This guide covers how to.

Article Content

FIBER OPTIC CONSTRUCTION STANDARDS

Fiber optic cable sequential numbers are required at each pole location and vault wall. Sequential numbers will identify conduit length, and slack left in vaults and at poles.

Cable & Pole Protection

Slingco makes utility pole framing and installation easier and more cost-effective than ever. Slingco stores flat on any work vehicle and — with a few twists — transforms into the industry's most helpful ...

Riser Tubing for Drop Cable Protection

Riser Tubing is a non-metallic, UV-stabilized PVC pipe used to protect vertical sections of fiber optic and copper drop cables where they exit underground conduit and transition into buildings ...

How to Protect Fiber Optic Cable Outside: A Complete Guide

The key to success lies in multi-layer protection—choosing outdoor-rated cables, using conduits or armor where necessary, and maintaining proper grounding, sealing, and inspection ...

Telecom Cable Protector

The CottGard® U-shaped telecom cable guard is a high strength, lightweight, maintenance free system specifically designed to prevent impact damage to cables installed on utility poles.

Fiber optic protective pipes

We offer a wide range of sizes and color-coded pipes for easy identification on-site. Choose our products for the assurance that your fiber optic network will be protected for years to come.

Tower Accessory Components

The structural integrity of cell phone towers is paramount, and our Top Pipes for Towers or Poles are engineered with high-strength steel, hot-dipped galvanized for corrosion protection.

Cable Protection Pipe Systems | Pipelife

Either rigid or flexible, made of PE, PP or PVC, sand-proof, waterproof or fireproof, our wide range of cable protection pipes offer you peace of mind with fast, flexible and reliable installations.

Tower Accessory Components

The structural integrity of cell phone towers is paramount, and our Top Pipes for ...
Riser Pipes & Wire Guards

Amphenol Riser Pipes and Wire Guards are constructed out of lightweight, UV stabilized PVC that will not rust, dent or corrode. A smooth inside surface finish prevents cable snags. They can be easily ...
