

Fiber optic internet can be restored by replacing the router

Overview

Yes, you can often use your existing router with fiber optic internet, but there are crucial considerations. Understanding compatibility, potential limitations, and when an upgrade is necessary will ensure you get the most out of your high-speed connection. Fiber internet transmits data using light signals through fiber-optic cables, which differs from traditional DSL or cable internet. Instead of a modem, fiber connections require an Optical Network Terminal (ONT), a device that converts fiber signals into an Ethernet connection. This guide will break down everything you. If you have replaced a Wi-Fi router before, such as when you moved from an ISP-supplied gateway to a retail router, you already know how tedious the process can be. Swapping one Wi-Fi router for another can be a pain when you have to reconnect many existing devices, especially those without a. Are you considering replacing your router?

If your router is more than 5 years old, has connection issues, or if you just want to improve your range and speed, it may be time to replace your old router.
