

How much does a laser diode cost per meter

Overview

Electricity costs depend on your laser cutter's wattage and usage time. On average: Diode lasers (5W-20W) use about 60-150 watts per hour, costing just a few cents per hour. The wavelength, power, spectral qualities, package type, cavity type and quantity will all have an effect on the price. You can buy a laser diode for less than a dollar. But the price can also be in the tens of. Check each product page for other buying options. Smart Filtering As you. Laser Diodes and Modules are semiconductor devices that can emit a beam of high intensity focused radiation, typically in the infrared, visible or ultraviolet wavelength ranges of the electromagnetic spectrum, coherently (light waves of the same wavelength, phase and direction). With power ranges. Laser Diodes | UV | 375 - 400 nm Laser Diodes | VIOLET | 405 - 415 nm Laser Diodes | BLUE | 420 - 488 nm Laser Diodes | GREEN | 510 - 520 nm Laser Diodes | RED | 635 - 655 nm Laser diodes, which are capable of converting electrical current into light, are available from Lasertree with center wavelengths in the 375 - 2000nm range and output powers from 1.
