

How to connect the wiring for a fixed partition cabinet

Overview

This guide provides a comprehensive overview of the process for installing electrical fittings in office partitions. It covers key steps, safety guidelines. High-voltage wiring, such as non-metallic (NM-B or Romex) cable, must be clamped and secured to the cabinet structure, especially where it passes through drilled holes in wooden framing members. Construct control cabinets in a fraction of the time through simple manual wiring without tools: WAGO Push-in CAGE CLAMP® Technology allows you to reduce costs, increase the safety of your application and reduce the time and effort for control cabinet wiring by up to 50 percent. Looking at another similar product from legrand, the instructions are to just drill two holes in the wall and pass. O2 is a time-tested office partition furniture system that includes a comprehensive vocabulary of panels, power/cabling management, work and storage components as well as accessories.
