

How to install the dustproof ring on the distribution box

Overview

The installation procedure for the ring type unit can be simplified to: wire the unit, install the cover, insert the meter into the socket, and install the sealing ring. Everyone knows that dust particles in outdoor environments are extremely small, and the box's built-in door seals are often insufficient. It takes the incoming power and safely distributes it to different circuits throughout your building. IP65 rated, sealed, all-aluminum enclosure for enhanced protection against water and dust ingress with mounting capabilities and NPT connections for installing electrical conduit.
