

How to set up fiber optic on a TP-Link router

Overview

In this tutorial, we'll guide you step-by-step through simple and effective configuration of your TP Link fiber optic router. Setting up your TP-Link router for fiber optics may seem like a daunting task, but with the right steps, it can be. When you sign up for CenturyLink's fiber internet service (FTTH), they'll install an optical network terminal (ONT) somewhere in your house that converts the fiber optical into an ethernet cable. Usually, CenturyLink will also install their own modem in your house to provide Wi-Fi networks and make. However, setting up a fiber optic connection to your router can seem daunting if you're unfamiliar with the process. It's not always as simple as plugging a new router directly into the wall. This comprehensive guide combines industry standards with field-tested practices to ensure you achieve a rock-solid. 3 Back Panel □ POWER: The Power socket is where you will connect the power adapter. Please use the power adapter provided with this TL-WR1043ND Wireless N Gigabit Router.
