

Intelligent Desktop Insertion Loss Analyzer for Field Operations

Overview

First tablet-inspired, multifunction optical loss test set (OLTS) delivering insertion loss, optical return loss and fiber length measurements at two wavelengths in five seconds via fully automated bidirectional FasTesT™ analysis. Desktop Insertion Return Loss Tester with color screen has stable and reliable performance, which integrates stable light source, high-precision power meter, insertion loss meter and return loss meter into one multifunction instrument. Based on domestic customers' requirements, R&D team combined. Accidental line strikes on the pipeline or adjacent utilities, pipe movement from soil disturbance resulting in coating damage, or human damage occurring outside of work hours, whether by accident or on purpose, are all possible (although unlikely) when a pipeline is exposed. An automated, highly precise OLTS that does all the hard work for.
