

Ivory Coast OTN Router 200G

Overview

The solution adopts QT8600series equipment, with 2 100G CFP2 on the line side and 1 200G CPF2 on the client side each board, which can achieve 1.4T service capacity transmission with full configuration, and 8T service capacity transmission with 40CH DWDM MUX/DEMUX; the. To achieve massive information interaction and meet the demand for ultra-high speed and ultra-bandwidth data center interconnection (DCI), QSFPTeK has launched the 200G transponder - a customized OTN transmission platform for DCI applications. With over 20 years of innovations and practices, Huawei has. Sharetop's OTN Transponder Platform developed is highly integrated with advanced technology. A single port can stably transmit 200G-rate services. It is mainly used in the core layer and convergence layer network of national optical network backbone lines, operator MAN, data center interconnection. The 200G OTN Muxponder (MXP200GOTN) provides mapping and multiplexing for multi-service 10G to 100G client services to either 100G or 200G coherent line signals for the XTM Series of packet optical transport systems (P-OTS). Pluggable Coherent Optics The 200G OTN Muxponder leverages state-of-the-art. The Huawei OptiX OSN 1800 is a new-generation packet enhanced multi-service optical transport platform that supports unified switching of OTN/PKT/SDH services and access of any 2M to 100G services such as Ethernet, TDM, and private line services.
