

## **KVM switcher is slow to respond**

### **Overview**

High-end KVM switches add negligible input lag (often  $<1\text{ms}$ ) that is imperceptible in competitive play. Budget or older KVMs can introduce delays exceeding 2-3ms, hurting your reaction times. 0+ to support high refresh rates and. Does any one have experience with this model, and how to increase the switching speed?

Is it taking that amount of time to switch on the KVM or is it switching quickly but taking time to display?

What kind of hardware (computer, monitor) is attached to it and what OS are you running?

If it's. Switching my KVM from my desktop to my laptop is usually a 30-60 second ordeal when it should take maybe a few seconds at worst. The displays usually light up right away, complete with a mouse cursor. If you are unsure about which adapters work with the Avico KVM, please check out our Approved Adapter List. Open Display Settings in Windows and select Detect to resolve issues like "second. However, when using a KVM switch, you may encounter some common issues. Many problems stem from simple things like loose cable connections, outdated firmware, or minor compatibility glitches between your devices and the switch.
