

Laos Fiber-coated spiral wound tube best-selling product

Overview

The DERMABOND™ PRINEO™ Skin Closure System offers a powerful, non-invasive alternative to traditional skin sutures and staples. The spiraling technique consists in coupling a series of adhesive-coated strips, winding them around a mandrel, obtaining a tubular whose electrical, thermal, impregnation and mechanical characteristics are the sum of the ones of each layer. Politubes uses only the best high quality insulating. Established in 2009, SKN has been a pioneer and leader in supplying medical and laboratory equipment in Laos. Our mission is to provide the best equipment from around the world to improve the standard of health in Laos. It combines the strength, flexibility, and microbial protection of DERMABOND ADVANCED™ Topical Skin Adhesive with a secure, latex-free, self-adhering mesh to facilitate.

Article Content
