

Lithuanian Solar Energy Internet

Overview

The online platform, dubbed ' Solar Community ', is the product of Sun Investment Group, a unique project, which gives the opportunity to buy or rent a remote solar panel, which can be done using an online platform. We unite solar energy market players to inspire, encourage and help Lithuania to use solar energy as a clean, renewable energy source for energy independence and a secure future. To be an active partner of society, politicians and business, creating a suitable and sustainable environment for the. atform. As one of the initiatives in October 1st, 2019 we have implemented a remote solar power plant platform project which enhances the emergence of prosumers in Lithuania. Those are impressive numbers by any measure. Driven by progressive state policies and a robust prosumer market, the country added approximately 600 MW in a single year.

Article Content

Lithuania self-generated electricity: Unique 2030 Ambition

By rapidly expanding its solar capacity, empowering households to become energy producers, and investing in grid modernization, the country is not just reducing its carbon footprint—it ...
