

Mali Technical Support for Active Optical FP Devices

Overview

The Mali-C55 ISP is a complete solution that includes hardware IP, software drivers, 3A libraries (auto-exposure, auto-white balance, auto-focus), and a full set of tuning and calibration tools. Mali-C55 ISP will be available with Arm Total Solutions for IoT in the future. The Arm Mali-C55 image signal processor (ISP) is designed to support IoT and embedded applications where energy-efficient, high-quality image output is required, such as smart cameras for consumer and commercial security, hobby drones, and entry-level AR. Mali-C55 delivers upgraded image quality. Which is why we've built the FP Help Center designed to do just that. From basic product support and training videos, to installation guides and FAQs. We've provided everything you need to feel supported. This multicamera support. The Department of Defense Information Network (DoDIN) Approved Products List (APL) is the single consolidated list of products that affect communication and collaboration across the DoDIN. Disclaimer: Many contents are from Arm's official documents and blogs. The GPU generates video information through a dedicated, parallel engines which much faster than competing application specific standard products (ASSPs) that relies on the CPU to handle.

Article Content

Optical Active Device

BRIGHTEN PHOTONICS is committed to the optical fiber communication and optical fiber sensing, providing special optical fibers, optical passive devices, optical active devices, optical fiber sensor ...

Mali-C71AE Product Support

Get help with your questions about the Mali-C71AE with our documentation, downloads, training videos, and product support content and services.

Mali Maps & Facts

Mali is a landlocked country in West Africa with an area of 1,240,192 sq. km. Mali borders seven other nations Burkina Faso, Niger, Senegal, Guinea, Cote d'Ivoire, Algeria, and Mauritania.
