

Papua New Guinea Data Center DC Power Supply Cabinet Construction Case

Overview

Vertiv delivered a pre-configured, pre-tested SmartCabinet micro data center (assembled in Australia) that includes UPS power (6 kVA), intelligent rPDUs, environmental sensors, split cooling, security features and remote monitoring — eliminating the need for on-site IT commissioning. DC Data Center, precise energy sub metering for PDU/Server Rack/IT equipment, multi-circuit metering, centralized alarm&display, 3rd party system integration. The data center power distribution cabinet/row head cabinet (PDM or RPP) monitoring system can realize centralized monitoring and display of. Papua New Guinea faced growing demand for reliable IT services at a rural university that had doubled programs and increased enrollment, and needed to maintain uptime for a new IP phone system and other edge computing needs. As a newly developing country, PNG is transforming at an ever-increasing pace. Growth in its infrastructure includes power and water networks, public transportation, telecommunications. RPS managed the design and delivery of a data centre and disaster recovery centre for the Bank of South Pacific in Port Moresby, Papua New Guinea (PNG). Our range of services includes site selection, design, construction management, and IT connectivity implementation.
