

Qatar Yin-Yang Type Optical Attenuator Specifications

Overview

The newly launched 25-year sc yin-yang attenuator is a precision passive optical component specifically designed for fiber optic communication systems. It offers selectable attenuation values of 1db, 2db, 5db, 10db, 15db, 20db, and 25db. It adopts a standard sc interface design. The new 2025 sc type attenuator offers a wide range of 1db to 25db options, making it suitable for various applications including optical communication and fiber optic networks. Features a male-female plug-and-play design for easy installation, making it ideal for network engineering, data centers. Fiber Optic Attenuator is one kind of optical passive device which is used to debug the performance of the optical power in the optical communication system, debugging fiber optic instrument calibration correction, optical signal attenuation. And used for the attenuation of the input optical power. 10pcs SC/PC Yin-Yang Type Plastic Optical Attenuator The Yin-Yang Type Fiber Optic Fixed Attenuator is a type of connector that has one end as an adapter and the other end as a connector. Designed with the unique Yin and Yang SC/UPC connector interface, this attenuator ensures precise signal attenuation and seamless connectivity. Networking professionals and fiber optic technicians, this 10-pack of LC/UPC attenuators is perfect for managing signal power in your fiber networks. They work at both 1310nm and 1550nm wavelengths.

Article Content

10-Pack LC/UPC Fiber Optic Attenuators

These are the cool yin-yang style binaural attenuators that provide a fixed 20dB reduction - perfect for when you need to dial down signal strength without compromising performance.
