

Slow internet speed after fiber optic cable was converted to a router

Overview

Run a speed test to see what you're really getting. Disconnect old or unused devices. Fiber can improve the connection coming into your home, but it can't automatically fix what happens after that signal reaches your router, your Wi-Fi, or, ultimately, whichever devices you want to use. Think you know your routers from your repeaters — put your home networking know-how to the. Got new internet three days ago, 1gb download and 100mb upload. I was expecting dl speeds of 900+ on wired connection and 600+ on wifi when close to router, what I am getting is 100 (dl) on wired and max of 350mb on wifi when sitting on top of the router, other rooms in my apartment are getting. Many factors beyond the fiber optic cable itself can impact speeds, making troubleshooting essential to unlocking the true potential of your internet connection. Fiber optic internet promises blazing-fast speeds, transforming online experiences from frustratingly slow to seamlessly smooth. Here's the. Despite their robustness, fiber networks can fail due to: Physical Damage : Cuts, bends, or contamination in fiber cables or connectors. Hardware Failures : Faulty transceivers, switches, or routers.
