

Swedish Core Switch

Overview

Includes dual power supplies, hot-swappable modules, link aggregation (LAG), and support for HSRP/VRRP. Modular chassis or stackable designs make it easy to scale as your network grows. 1X support, SNMP, CLI/Web GUI, and network access control. LUND, Sweden — SwitchCore AB, a fabless semiconductor company here developing chips for next generation networks, has become a charter member of the recently established 10 Gigabit Ethernet Alliance (10 GEA). Other alliance members include 3Com, Cisco Systems, Extreme Networks, Intel, Nortel. There are different types of enterprise switches that perform various roles in these layer-based or hierarchical ethernet networks. Unlike access switches, which connect directly to end-user devices, the core switch focuses on aggregating and routing traffic between other switches, minimizing latency. This help center can answer your questions about customer services, products tech support, network issues. It usually has powerful processing capabilities, high.
