

Switch Leased Line Access Configuration

Overview

This chapter describes how to set up a synchronous leased line between a PortMaster 4 and another PortMaster product. The chapter provides guidelines for configuring both ends of the connection and includes the following topics: "Overview of Leased Line Connections" on. Can you please assist me with step by step commands to configure a leased line over two sites using router 1841 and Data link provided by COLT network Would really appreciate a detailed reply, I have got the network ip addresses. With switched lines, either a focal point or a distributed system can initiate and end sessions between the two. I have just had a 1GB Leased Line installed and the interface (connectivity presentation) is MMF (Multi Mode Fibre) and terminates at an ADVA FSP 150-GE102Pro, so I purchased a managed switch by FS, model S3700-24T4F, as this had SFP sockets. Prerequisites An SAG-1000 device is used. Background information You can connect private networks to Alibaba Cloud through. Before checking the configuration, ensure that configurations of the network-side ISDN switches connecting to the device are complete.
