

# What switch should I use for home fiber optic internet

## Overview

The best high-speed network switch you can get for most use cases is the Linksys SE3008. It has eight Gigabit Ethernet ports, an easy plug-and-play setup, and simple Quality of Service (QoS) features that prioritize audio and video streaming. In this post, we're reviewing some of the best fiber switch choices right now! We'll take a look at what they have going on specification-wise and how well these things perform overall. That way, when it comes time to decide which one suits your needs best, there will be no shortage of information. A switch is an integral part of a network which establishes connectivity among various connected devices on the network such as computers, phones, cameras, and so on. It also facilitates data transmission from source to destination. There are various types of switches depending on the network such.
