

What type of electrician does the distribution box belong to

Overview

An outside lineman is a type of electricians that specialize in electrical power line transmission. They can repair power lines, ensure the wires are functioning as they should, and that power is being distributed to the receivers and end-users as indicated in the design. A distribution board (also known as panelboard, circuit breaker panel, breaker panel, circuit breaker, electric panel, fuse box or DB box) is a component of an electricity supply system that divides an electrical power feed into subsidiary circuits while providing a protective fuse or circuit. Navigating the world of electrical distribution can be confusing, with terms like panelboard, switchboard, and distribution box often used interchangeably. A distribution box ensures that electrical supply is distributed in the building, also known as a distribution board, panel board, breaker panel, or electric panel.
