

Where is the Singapore butterfly-shaped optical cable factory located

Overview

The optical fiber core is located in the center of the cable body, two reinforcing cores are placed on both sides, and the outer layer is enveloped and sheathed to form a cable. FTTH is a communication technology designed to extend optical fiber transmission to users' residential or commercial buildings. These cables feature a flat and wide configuration that differs significantly from traditional round. In the field of information and communication, ZTT is dedicated to building the integrated industrial chain of optical fiber preform, optical fiber and fiber optic cable to provide customers with systematic end-to-end products and service solutions, enjoying the reputation of "home of special fiber. Here are some key areas where butterfly cables shine: Data Centers and Networking: Butterfly cables are ideal for high-density data centers. Audio-Visual Systems: In home theaters and professional audio. GJXH fiber optic cable is an indoor optical cable specially developed for FTTH (Fiber to the Home).
