Edmund Optics offers plate, cube, pellicle, polka dot, or specialty prism Beamsplitters in a variety of anti-reflection coatings or substrates. Standard Beamsplitters, which split incident light by a specified ratio that is independent of wavelength or polarization state, are ideal for illumination. The 6SXM series CCD rice color sorter is a high-tech product that integrates optics, machinery, electronics, and pneumatics, and has the function of secondary sorting. Our plate beamsplitters have a coated front surface that determines the beam splitting ratio while the back surface is wedged and AR coated in order to minimize ghosting and interference effects. Pellicle beamsplitters provide excellent.
