The outer layer is made of environmentally friendly PVC, which is soft and elastic. It can be stretched without damage, so you can use it with confidence.

Overview

In general, installing the optical fiber distribution box can be divided into three steps: installing the optical fiber distribution box on the rack, introducing the optical cable into the optical fiber distribution box, and planning the optical fiber path in the optical fiber. In general, installing the optical fiber distribution box can be divided into three steps: installing the optical fiber distribution box on the rack, introducing the optical cable into the optical fiber distribution box, and planning the optical fiber path in the optical fiber. The optical fiber distribution box allows people to easily access the optical fibers in the box, and can well protect the optical fibers. In addition, the drawer structure also facilitates high-density wiring and good cable management. However, because optical fibers are fragile and can be easily.
